We SOLVE the **chronic electricity crisis in Cameroon** with affordable, high standard, ready to go solar electricity, one installation at the time.

For your **Cultural association**, we can execute, from start to finish, within **weeks**, a **solar electricity** project for a **Hospital**, a **School** or a **community center**. Just say go, and it's done!

For **YOU**, who have been **blessed** and want to say **thank you** to that parent or community now struggling with electricity blackouts, give them a reliable solar electricity solution. They will bless you even more.

Houston, we have a problem - The chronic shortage of electricity in Cameroon today has deep consequences: No lights, kids cannot study properly, hospitals cannot provide the lifesaving care patients need, security concerns for citizens, and loss of productivity for local businesses.

Trust - A Houston based company by a fellow Cameroonian who has been installing solar panels in Cameroon since 2012 with nearly 50 installations including 5 hospitals.

Integrity - Seal the deal here in USA and it happens within weeks in Cameroon as per your specifications.

No headache - A well trained team of Cameroonians will get your solar installation up running with high quality material from the USA.

Clean Energy, lower cost - No polluting fumes or noise from gasoline powered generators. Save on cost compared to gasoline generators

With as low as \$8500 your cultural association can provide lighting and more for a rural hospital or a boarding school making a real change for a generation of Cameroonians.

With as low as \$5500 get an electrical backup solution for your residence. When eneo (formal sonel) is off, Vianne is on

With \$2500, you can pay the next 10 years electrical needs for a rural home; give back to that parent who changed your life
